Blake,

Here are short write ups of the technical input I have provided. Please let me know if this works or you need other information.

Mark

Subject: Work on Homestake

Mark, I'm putting you in for an award related to the technical input you provided for Homestake and possibly for the San Mateo Creek Basin (if you think that work has generated some outcomes), but I need some assistance with some of the particular work you performed. I want to include specific examples of the technical work you performed and where possible, the outcomes of your efforts. I just need a couple of sentences, today, but I'll need more detail next week, if my nomination is approved.
